upstanding powerful dog, bite central too low in sizes slightly forward, topline alright, good spring of rib, fairly deep croup, coat needs much tighter curl, when moved passed but when got into drive moved very well - very good

very good - he is typical in outline, good bite, brought skull, needs a darker eye and smaller ears, front angulation ok, rather deep in body, could be shorter coupled, major problem is a very coat lacking curl, moved with drive, a little close when moving behind

very good - typical curly in appearance with typical expression, would like more strength of muscle and a darker eye, fairly good coat, principal problem - overweight, slightly wide in front, when moves passes, not moving truly behind, her ears could be smaller
